Digitalization - One size fits all?

Not a one size fits all – but probably some advantages for all?

ROSCHIER

Mapping of business processes is the first step to identify advantages with an increased level of digitalization and to decide what to prioritize

What should be digitized?

Pros

- Increased efficiency
- Enabling new services
- More reliable/predictive results
- Improvements in communication
- Avoid human errors

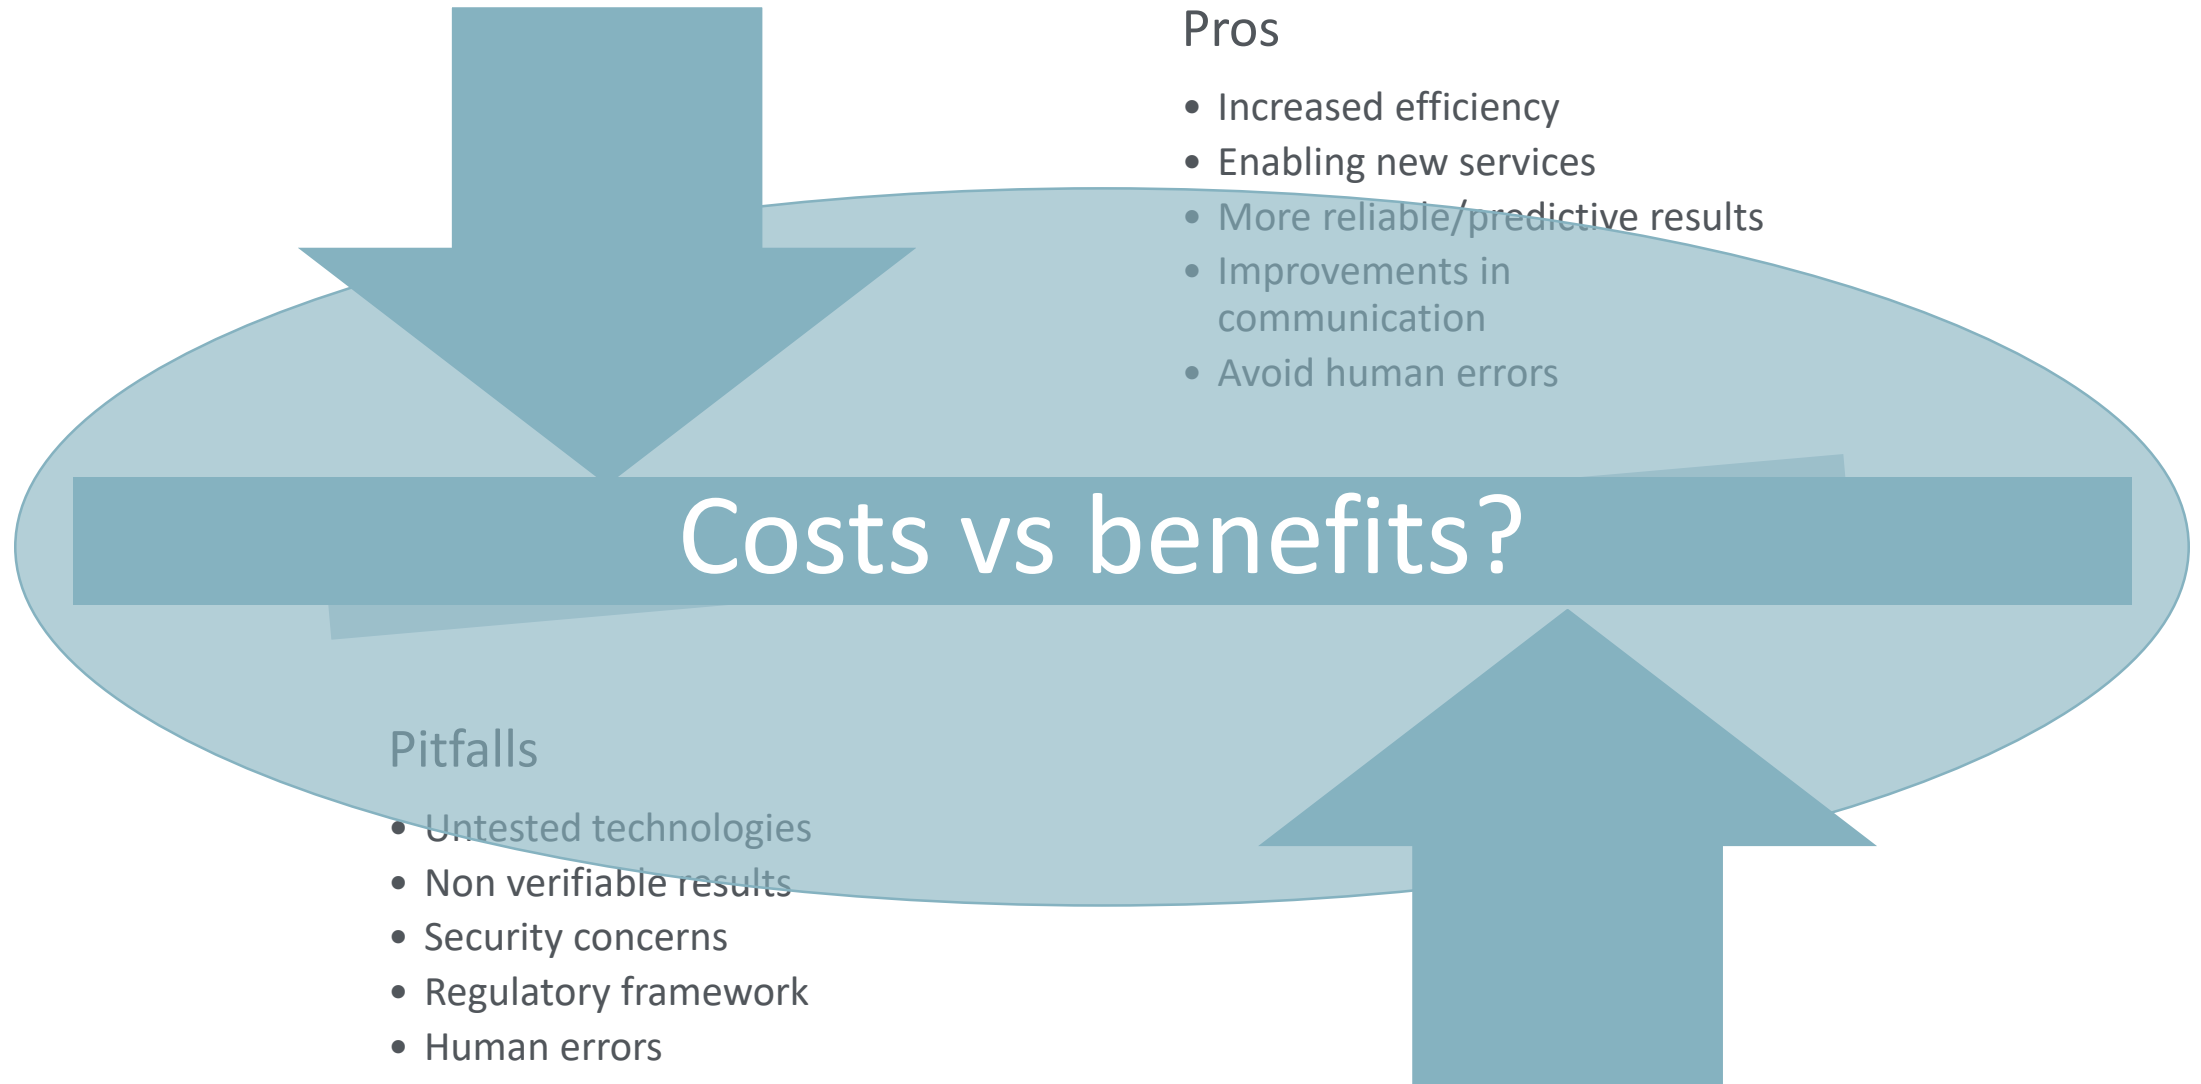

Pitfalls

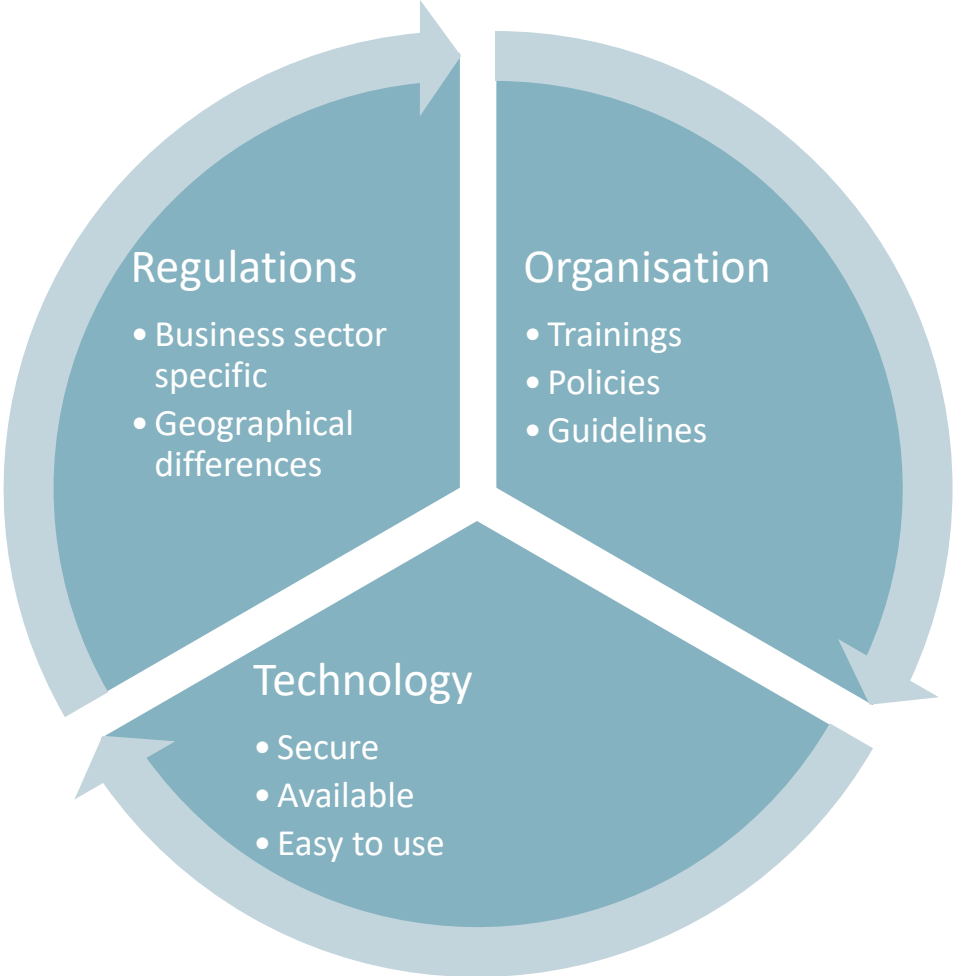

- Untested technologies
- Non verifiable results
- Security concerns
- Regulatory framework
- Human errors

What should be digitized?

Handling the pit falls

Data protection is always relevant

Identify the roles – controller/processor/data subject

Evaluate the legal grounds

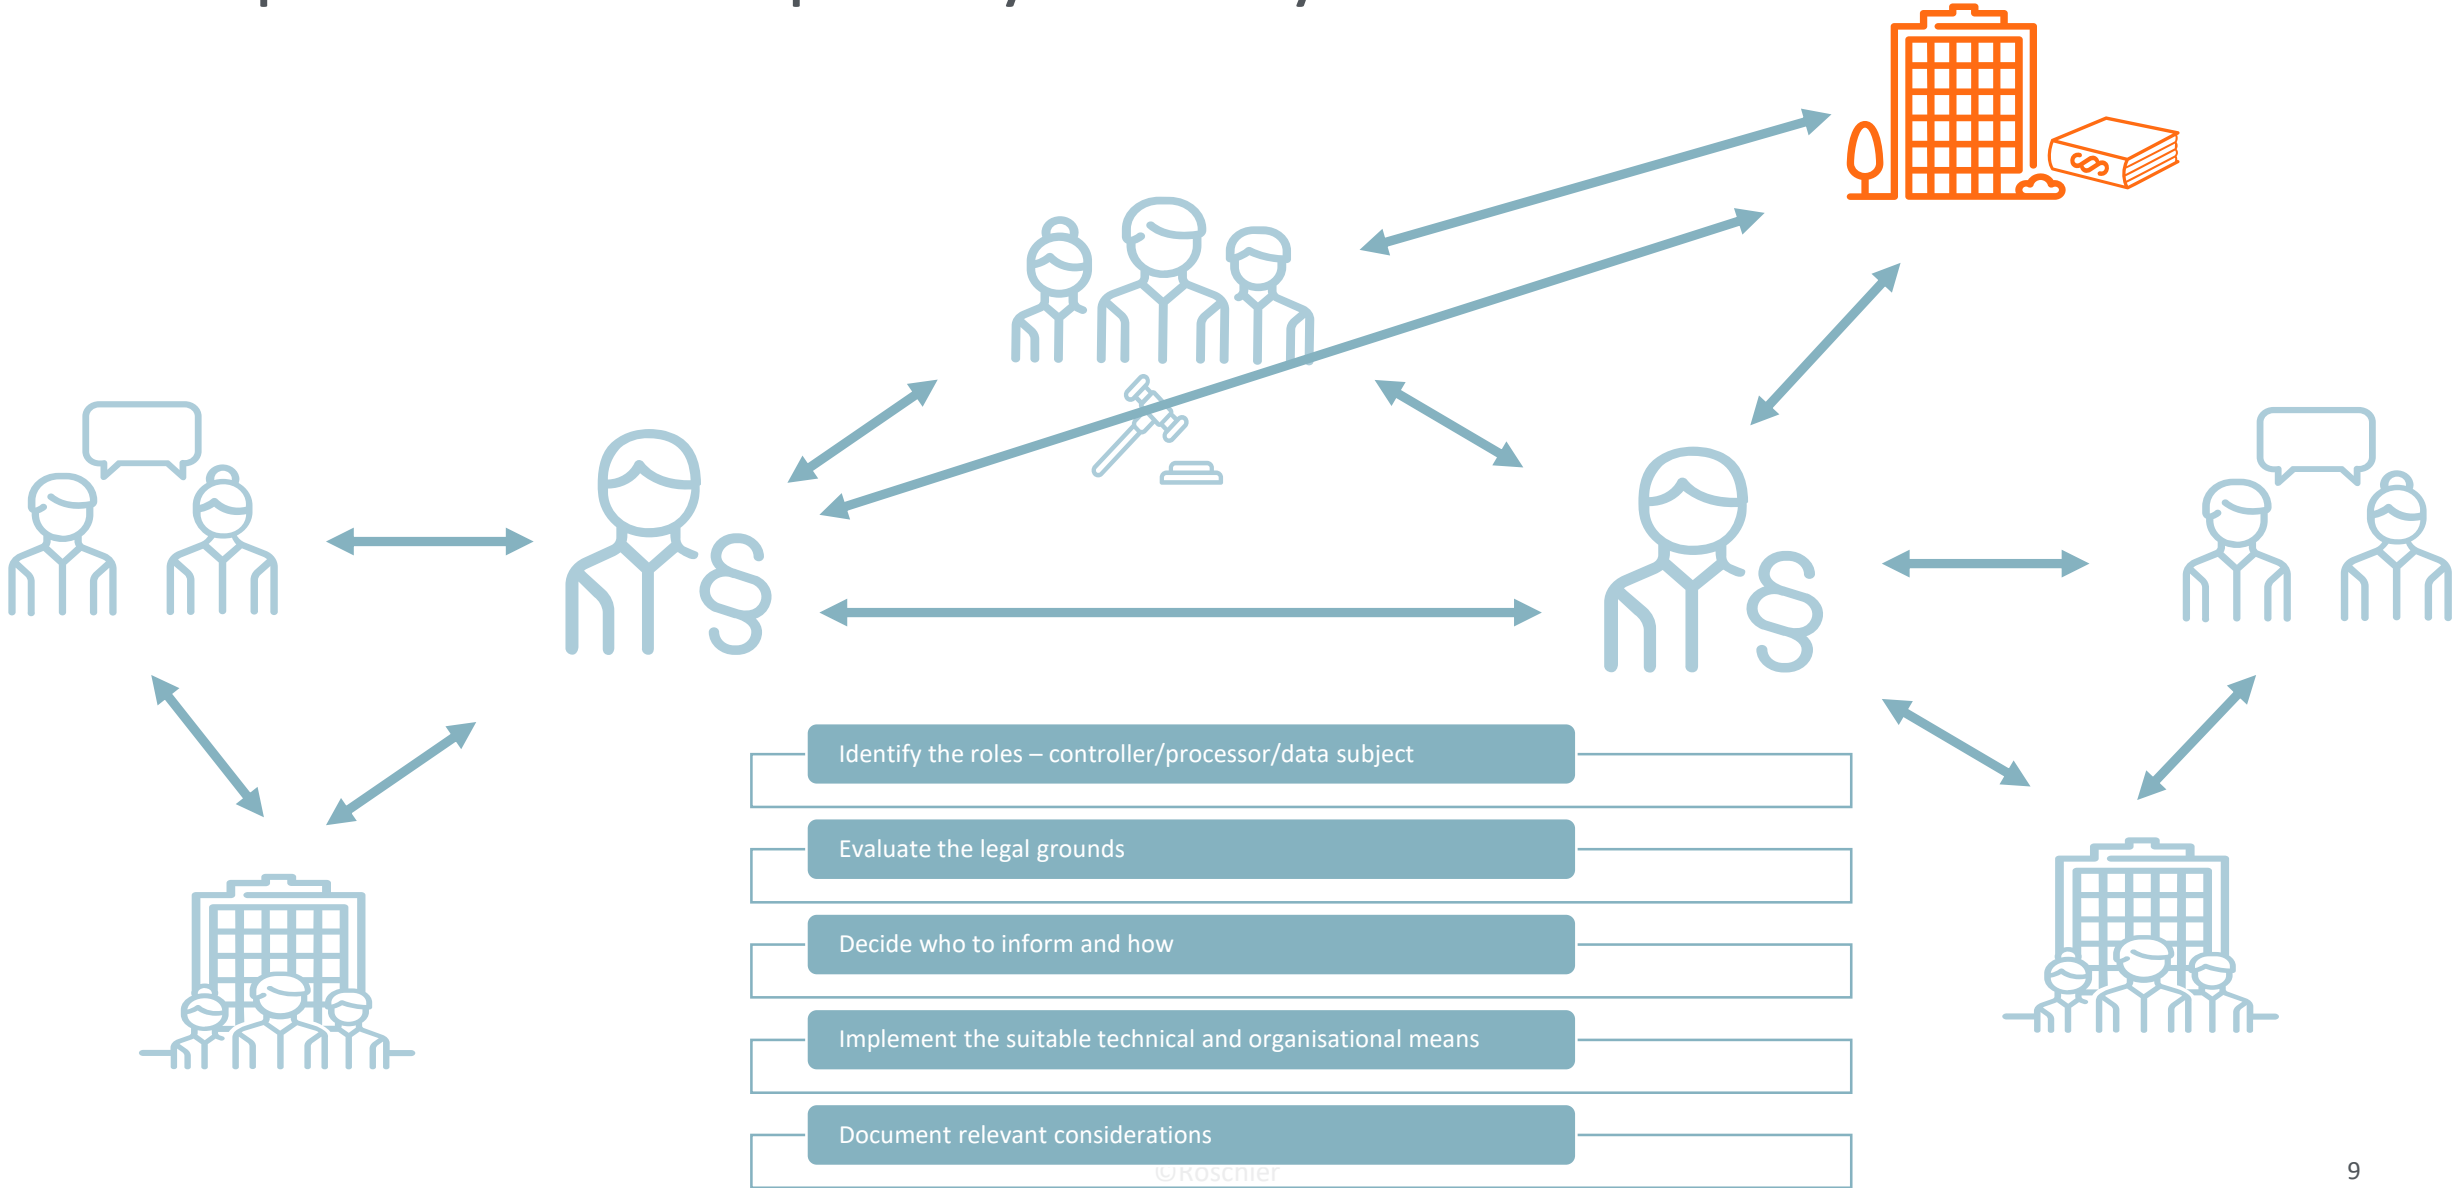

Decide who to inform and how

Implement the suitable technical and organisational means

Document relevant considerations

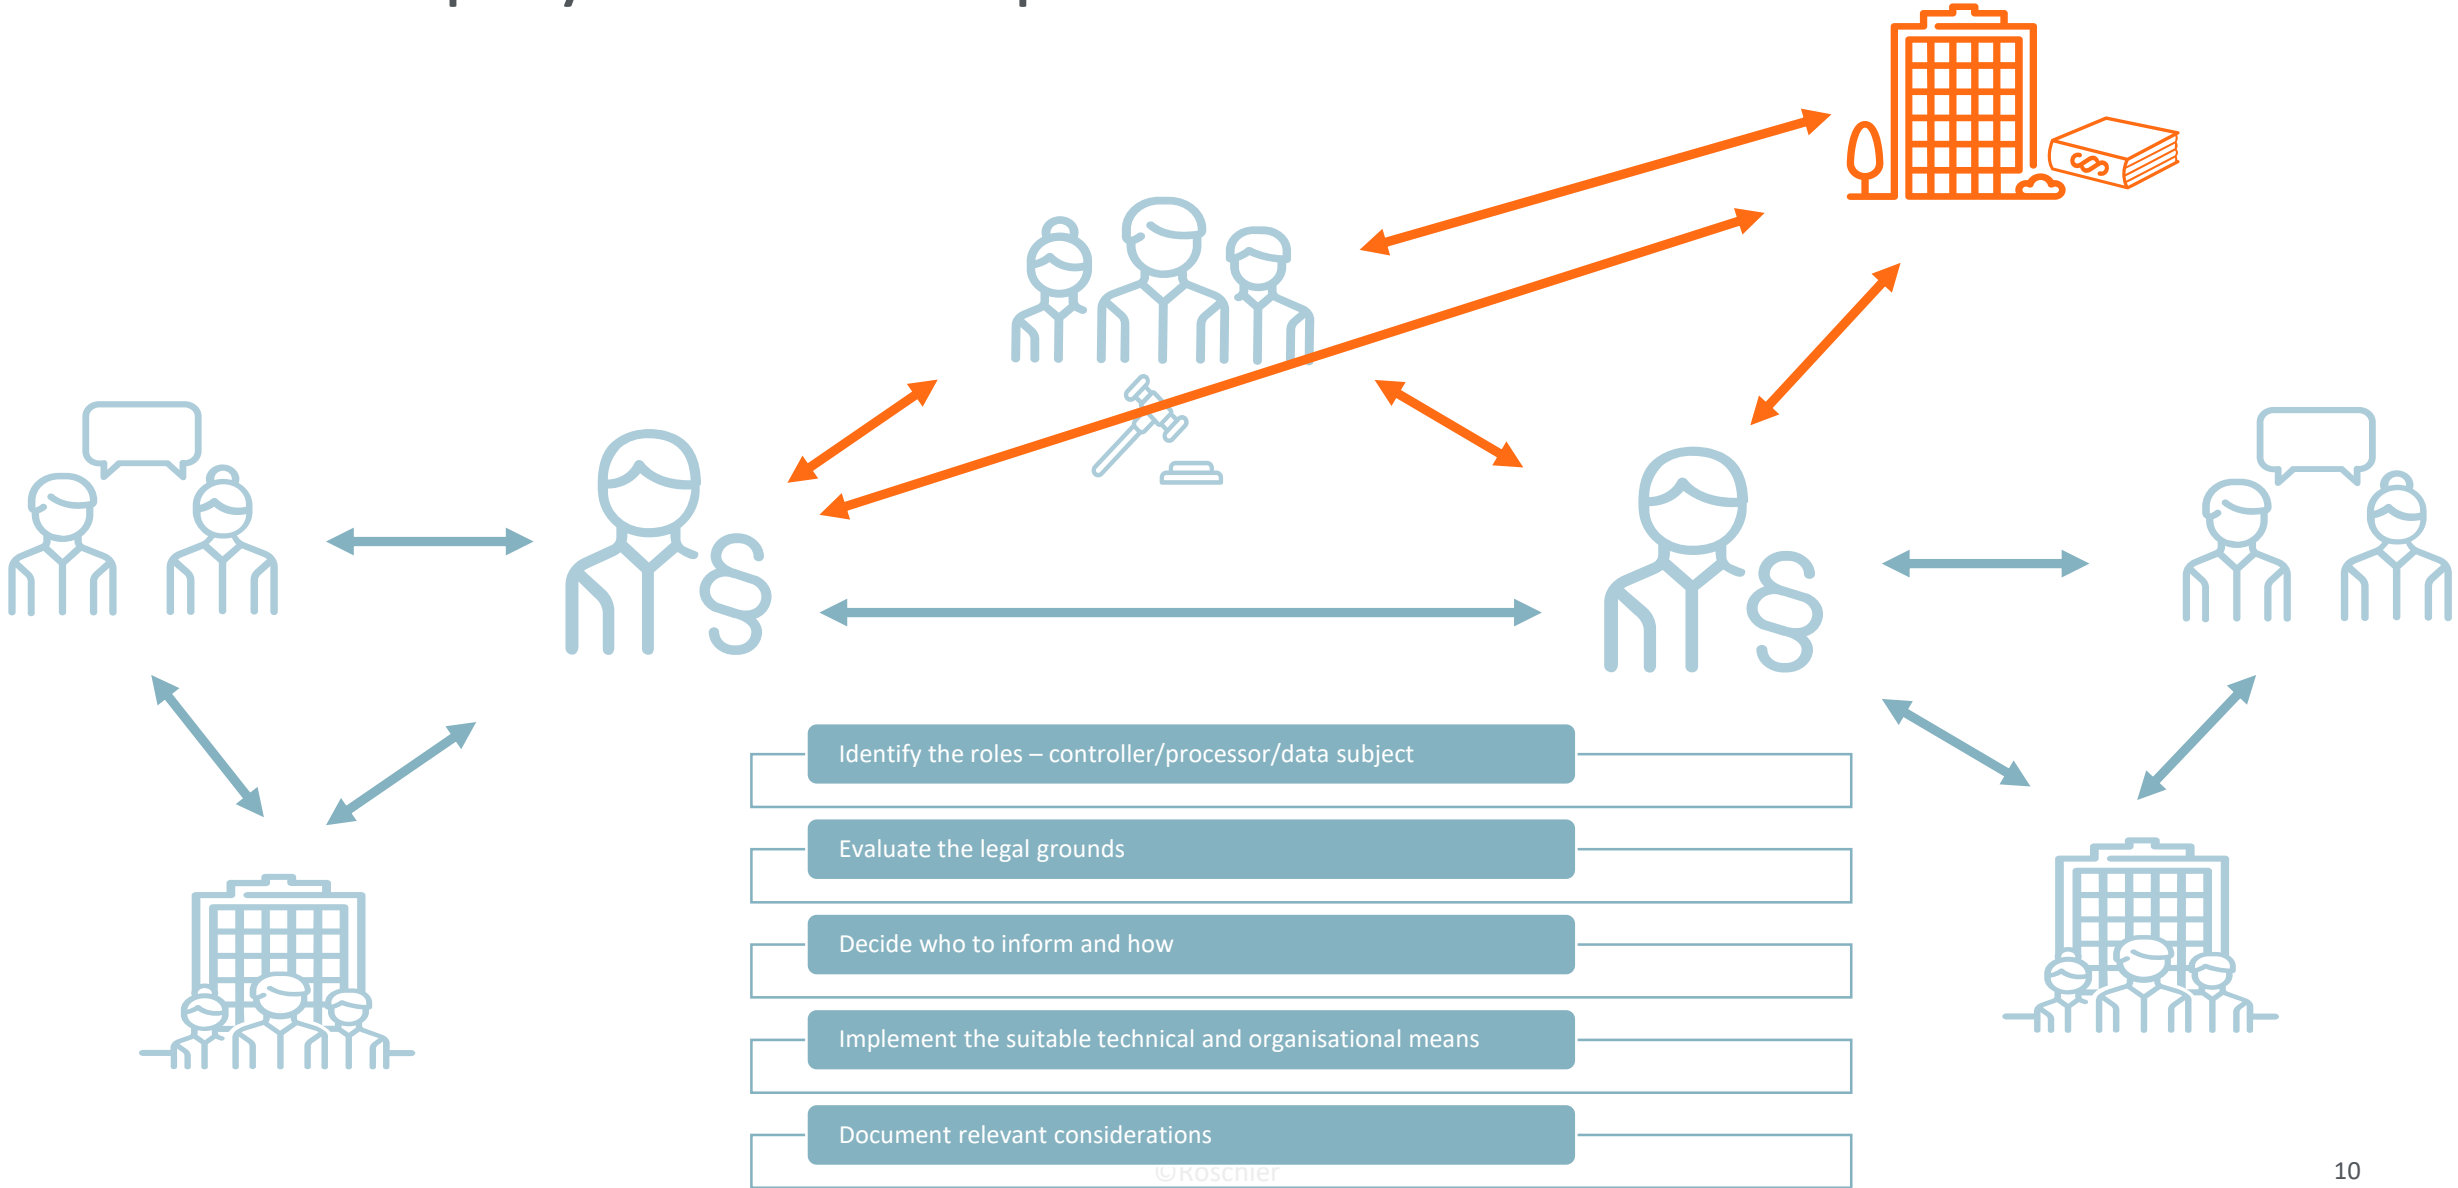

Data protection and privacy is always relevant

ROSCHIER

Aim to simplify as much as possible
